"Thank You"  
Day

2007 Messages

Inspire and encourage our medical researchers by sending a personal message of thanks.

Proudly supported by:

## Dear Researchers and Research Supporters

Now in its fifth year, "Thank You" Day is an award-winning public awareness campaign that recognises the achievements of health and medical researchers whose work saves and improves lives. "Thank You" Day also recognises the work of philanthropists, advocates and corporations for supporting medical research.

Research Australia would like to thank the thousands of Australians who sent a message of thanks or participated in one of the Australia-wide "Thank You" Day events. Almost 204,000 messages were generated during the month long 2007 campaign alone and messages are still being received.

These messages and stories of hope, sadness and encouragement are sent to the relevant researchers to recognise, encourage and inspire them. They will also be sent to the decision-makers and community leaders to show them how important health and medical research is to Australians and to help us promote the difference health and medical research makes to people's lives.

We urge you to continue to support Research Australia's work and "Thank You" Day so that the community's voice of support for research remains a key priority.

There are two categories of messages, one directed to researchers from a specific organisation or area of research and general messages. Many thousands of messages with simply "thanks" or "thank you" have been removed for simplicity.

Research Australia would like to sincerely thank the supporters of "Thank You" Day in particular the National Health and Medical Research Council and MBF Australia.

We hope that you are encouraged and inspired by these messages and continue your wonderful work that helps us enjoy a better quality of life.

All health and medical researchers	<ul style="list-style-type: none"> <li>To the health and medical researchers of Australia. You make our world a better place and we applaud you</li> </ul>

	- LOUDLY!! Thank you.
All health and medical researchers	● We appreciate all your efforts in tackling the awful illnesses faced by members of our community. Well done! Steve.
All health and medical researchers	● We hope that your research into all aspects of Cord Blood continue to be successful. We are delighted to have been able to support you through the Inner Wheel Australia Cord Blood Research Grants - our National Project. We are continuing to raise money
All health and medical researchers	● Well done to all!
All health and medical researchers	● Whenever I see a breakthrough in health and medical science/research announced I am filled with gratitude for the people who perform this fantastic work. Thank you so much. Aleks (SA) 20 years old.
All health and medical researchers	● Would just like to send my appreciation to all the scientists that contribute to the improvement of our society through research and keep up the good work thanks Mark
All health and medical researchers	● You are the real champions! Keep up the good work!
All health and medical researchers	● Your behind the scenes work is valuable and very much appreciated.
All health and medical researchers	● Your dedication to your profession is greatly appreciated. Kandy
Alzheimer's Research	● Thank you for researching the prevention of Alzheimer's disease-people's memories are very important.
Arthritis research	● My mother struggles with arthritis... I would love to see a breakthrough in this area. Please keep up the hard work. Your efforts are hugely appreciated.
Arthritis research	● Thanks to your efforts in developing medications like Enbrel & Humira I now have my life back after suffering the daily agony of ankylosing spondylitis. It is hard for most people to appreciate being able to do simple things like being able to walk...
Beyondblue	● We, as midwives, child health nurses and midwives appreciate the funding invested in launching the National beyondblue Perinatal Mental Health Plan. To 'Name the Pain' and to offer a path out of the pain for women before and after their babies are born is invaluable.
Blood Disorders	● Check peoples blood in case infected. Grayson Yr 4
Bone Joint & Skeletal Conditions	● Thanks for caring for my health!
Bowel cancer and breast research	● If it wasn't for the ongoing of refineent chemo and other research I would be without several friends.
Bowel cancer research	● I lost my dad 12 years ago to this insidious disease, but I thank you for all your hard work, in saving the fathers of countless people out there who will never know how it feels to sit and wait with someone dying of this disease. This is a hard and awful.
Bowel cancer research	● Thank you all for giving me an opportunity to live. Although I do not know who you all are, I am overwhelmingly grateful for everything each of you do everyday; there are just not words to tell you how much I appreciate your work. Thank you so much!
Brain Nervous System and Muscle Disorders	● Thank you for giving hope to people inflicted with spinal cord damage and acquired brain injury
